Adobe After Effects Cert.Course

Course Duration : 60 Days

Topics & Details

Introduction to After Effects:

★ **Introduction to Adobe After Effects**

-Overview of After Effects and its applications.

-Understanding the workspace, panels, and timeline.

-Setting up a new project and composition.

-Importing assets (video, images, audio).

★ **Basic Animation and Keyframing**

-Introduction to keyframes and the timeline.

-Animating position, scale, rotation, and opacity.

-Understanding easing and motion paths.

-Using the Graph Editor for smoother animations.

★ **Working with Layers**

-Understanding different layer types (video, shape, text, solid, null).

-Layer properties and layer stacking order.

-Pre-composing layers for organization.

-Parenting layers and using null objects for advanced control.

★ **Text Animation**

-Creating and styling text layers.

-Animating text with keyframes.

-Using text presets and animators for complex effects.

-Creating kinetic typography.

★ **Shape Layers and Masks**

-Introduction to shape layers and their properties.

-Creating and animating shapes.

-Using masks for reveals and transitions.

-Combining shapes and masks for complex designs

★ **Effects and Presets**

-Applying and customizing effects.

-Working with common effects (blur, glow, color correction).

-Using presets to speed up your workflow.

-Creating and saving custom presets.

★ **Working with 3D Layers**

-Introduction to 3D space in After Effects.

-Enabling 3D on layers and understanding the 3D axis.

-Animating layers in 3D space.

-Working with cameras and lights.

★ **Motion Tracking and Stabilization**

-Introduction to motion tracking.

-Tracking and stabilizing footage.

-Applying tracking data to layers.

-Using Mocha AE for advanced tracking tasks

★ **Working with Expressions**

-Introduction to expressions in After Effects.

-Creating basic expressions for automation.

-Using wiggle, loop, and other common expressions.

-Linking properties with expressions for complex animations

★ **Compositing Techniques**

-Introduction to compositing and keying.

-Using the Keylight effect for green screen keying.

-Working with mattes and blending modes.

-Compositing multiple layers to create complex scenes

★ **Rendering and Exporting**

-Setting up the render queue.

-Understanding output modules and formats.

-Rendering for different platforms (web, broadcast, social media).

-Optimizing render settings for quality and file size.

★ **Final Project: Putting It All Together**

-Planning and executing a final project (e.g., title sequence, short animation).

-Integrating various skills learned throughout the course.

-Final review and polishing.

-Rendering and exporting the final project.
